Management takeaways

1. Growth did not fully convert to earnings: FY2024 net revenue is €5,760 mn above FY2017, while operating profit is €562 mn lower.

2. Margins remain below early-period levels: operating margin moved from 13.6% in FY2017 to 8.7% in FY2024; gross margin also eased.

3. Watch cost discipline and revenue quality: track operating expense intensity alongside net revenue per hectolitre and beer volume.

Caution: regional historical comparability depends on the allocation assumption. Brand revenue is not available after FY2022 in the source extract. All figures are from a synthetic teaching dataset.
